# 20 innovative tools **READY** to get the job **done**

Prime Dash comes ready with **20 different financial reports** and **simulation tools** to help consultants deliver the best financial results for their clients.

Prime Dash tools have been strategically developed to help consultants excel **before, during** and **after** consulting engagements.

## **Prime Dash makes it easier to take on more clients**

Prime Dash will automatically analyze a company's financial data to provide the **best decisions** to take in order to reach maximum profitability.

# STRATEGIC FINANCIAL REPORTS

## Financial Dashboard

Makes it seamlessly easy to visualize the financial performance of a company for each period as given.

## Break-Even Report

Establishes the minimum revenue a company must reach to cover its financial obligations or expenses.

## Financial Ratios Report

Provides Liquidity, Profitability, Financial Leverage, and Efficiency ratios to understand the key performance indicators.

## Products/Services Report

Provides an instant overview of the best performing products and or services.

## Cost Report

Provides a detailed overview of all costs and for all periods.

## Comparative Cost Analysis

Performs a side-by-side examination of the financial efficiency of the company through its cost structures, to determine if overspending or irregularities have occurred.

## Financial Grade Report

Provides an instant feedback on the company's key financial structures in the areas of Efficiency, Stability, Control, Growth, and Profitability.

## Blueprint Report

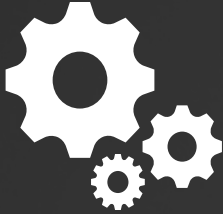

Provides the minimum income goal the company should seek and the maximum amount to spend for each cost line item specific to the company.

## Business Valuations

Provides the market value of a company by analyzing a comprehensive set of financial parameters, assumptions, and benchmarks.

# BREAKTHROUGH SIMULATIONS

## **Price & Quantity Simulation**

Determines how changes in prices charged and quantities sold will affect the overall profit level of the company.

## **Profit & Loss Simulation**

Determines the expected profit level as revenues and specific cost line items are changed.

## **Spending Plan Simulation**

Determines the optimum spending limit for each cost based on a revenue projection.

## **Financial Plan Simulation**

Determines the minimum revenues to achieve and optimum spending for each cost given a specific profit amount.

## **Budget Simulation**

Performs a complete analysis of the financial performance of the company to generate a complete budget to use moving forward.

## **Payback Simulation**

Provides an estimated timeframe to pay back an a given investment/loan based on specific conditions such as profit sharing and taxes.

## **Personnel Simulation**

Determines how changes in the number of staff, compensation, benefits and bonuses will affect the overall profitability of the company.

## **Break-Even Simulation**

Determines the expected profit level, break-amounts, and break-even days as revenues and costs are changed.

## **Profit Simulation**

Determines the financial model required to achieve the desired profitability by simply changing the profit goal percentage.
